POLYPRO SHUTTERS™ PP

We offer four beautiful white shades that you can choose from in this range. An environmentally-safe water-based paint is used on these shutters.

The use of solid core with reinforced aluminium in our stiles and blades give our shutters the extra durability and stability it needs.

Why Choose POLYPRO SHUTTERS™ PP

- Durability

PolyPro Shutters™ PP is virtually maintenance-free. These shutters will not fade, peel, or flake with proper use & care. They feature aluminium-reinforced cores in the stiles and blades.

- Energy Efficient & Cost-Effective

PolyPro Shutters™ PP allows you control over how much sunlight and air you allow into your home - helping reduce energy costs.

- Sustainable

These shutters tend to last longer than blinds or shades making them environment-friendly and cheaper alternatives to other window furnishings.
